

# The Herrington Report

January 9-13, 2012

## **Class Wikispace Webpage**

<http://armstrong-herrington.wikispaces.com>

This week in class we'll be doing our next to last week's worth of learning new content in Life Science. We'll talk about cellular respiration and the wonderful fungi world. On Friday I'm hoping to get our notebooks reorganized and back into shape. Those of you who have misplaced yours need to get a new one. I'll have the available materials to do your tabs and sections during class.

I've updated the website with information on what we're studying this week. Don't miss out on taking advantage of the information if you miss class, need some review, or didn't understand things the first time.

## **Vocabulary and Key Terms:**

Cellular respiration, yeast, glucose, fungi, unicellular, multicellular, eukaryote, prokaryote, heterotroph, spores,

## **Homework:**

Mon./Tues.— **Background on Yeast**

Wed./Thurs.— **Finish classwork on fungi if not finished in class.**

\*\*If you would like to write an article for the newsletter, contact me.

## **New This Nine Weeks:**

- MSU Engineering Night
- Mrs. Herrington's Wednesday After School Conference/Detentions
- Alphabetical Line for Lunch Until Further Notice
- Missing Homework Three Times = After School Conference Detention
- Missing Work or Makeup Work = After School Conference/Detention
- Four infractions = After School Conference/Detention
- Three Tardies = After School Conference/Detention
- Random Bellwork Quizzes
- New Classroom Jobs Sign Up Sheet
- Some Fridays = Test Prep
